1 Measured using ISO/IEC 24734, excludes first set of test documents. For more information see http://www.hp.com/go/printerclaims. Exact speed varies depending on the system configuration, software application, driver, and document complexity. HP recommends that the number of printed pages per month be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period. Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups. Declared per ISO 9296 and 7779; values are subject to change. Configuration tested: HP LaserJet CP5525xh, printing at 30 ppm on A4 paper. HP SureSupply alerts you when your print cartridge is running low and helps you purchase online. To learn more, visit: www.hp.com/go/SureSupply.
