

HP Web Jetadmin 8.0

Web-based peripheral management software

Get the most from your printing and imaging environment. Make it modern, streamlined. HP Web Jetadmin 8.0 provides the monitoring and management capabilities you need to create a first-rate printing infrastructure that promotes productivity and cuts waste.

Improve color management and affordability

- **Implement color access control.** Lock out color printing, define user authorization lists on certain HP devices, and get detailed color usage reporting for organizations managing color.
- **Track color usage on shared devices.** The HP Web Jetadmin Report Generation Plug-in enables print administrators to track usage and consumables trend data by user for an entire fleet of printing and imaging devices, helping to create balanced asset deployment.

Lower printing costs

- **Ensure that you always have the supplies you need** with consolidated, simplified, and predictive supplies monitoring and ordering.
- **Enable advanced automatic discovery** to automatically find and remotely configure printing and imaging devices during off peak hours.
- **Create groups and subgroups** to improve organization, making it easier to locate devices and enable logical, simple asset tracking.
- **Automatically upgrade firmware in batches** for HP Jetdirect print servers and supported printing and imaging devices.
- **Add plug-ins** to provide even more options to manage networked peripherals. With plug-ins, HP Web Jetadmin can be adapted to the changing demands of your business without requiring you to retest or requalify.

Standardize print management

- **Eliminate worries: integrate with enterprise applications** such as HP OpenView Operations, IBM Tivoli, or BMC Remedy—HP has a solution for you.¹
- **Enable alerts and real-time status reports** to avoid device downtime.
- **Download the new PC Printer Discovery Plug-in** to obtain comprehensive asset inventory, usage, and supplies data² on locally connected (USB or parallel) printers.
- **Configure settings for fleets of printers**, including default, security, alert, and digital sending settings.
- **Secure Storage Erase** ensures that data stored on a hard disk drive or other erasable storage device is entirely erased. You can perform the operation for individual devices or fleets of devices immediately, or schedule the operation to occur at off-peak hours.
- **Create configuration profiles of device settings** that may be automatically applied to newly connected peripherals.
- **Support non-HP devices** through HP's third-party device certification program, which allows you to use a single print management software tool to manage all of your peripherals.
- **Employ Intelligent Update** to efficiently add updates and plug-ins without reinstalling HP Web Jetadmin.

HP printing and imaging systems help you create powerful, professional communications easily. Printers, supplies, accessories, digital solutions, and services are designed to work together and invented to meet your business needs.

¹ For more information, contact your local HP salesperson.

² Some limitations apply.

From standard web browser:

- Track usage by user
- Install firmware
- Configure device
- Conduct remote diagnostics
- Organize devices

What's new for HP Web Jetadmin 8.0?

- **Security enhancements** with snmpv3 device support and encrypted credential storage, which protects user and system passwords from unauthorized access or changes.
- **Report usage data** at the device or user level with the Report Generation Plug-in 3.0.
- **Complete asset management** with the new PC Printer Discovery Plug-in, which provides asset inventory, usage, and supplies data³ for PC-connected printers, offering network administrators a more complete picture of their printing and imaging environment.
- **Color access control** through the HP Driver Preconfiguration Plug-in, device access configuration, and reporting for organizations needing color management.
- **Pre-defined basic profiles** provide simplified user-interfaces that eliminate seldom-used tasks and fields for those users performing minimal tasks.
- **Supplies management**—through alerts and customizable reports, HP Web Jetadmin can consolidate and assist in supplies reordering, ensuring that supplies are available when you need them.
- **Enhanced multi-vendor device support.** HP Web Jetadmin has improved support for standard printer MIB devices including several new device alerts, diagnostics, and configuration options.
- **Link directly to HP Instant Support** for issue-specific resolution, reference, troubleshooting, and diagnostics. Communicate online with a support specialist if needed.

Supported application plug-ins

- **HP Web Jetadmin PC Printer Discovery Plug-in**—Provides inventory, usage, and supplies data³ about locally connected (USB or parallel) printers to help IT administrators conduct more complete asset inventory assessments.
- **HP Driver Preconfiguration Plug-in**—Allows administrators to set driver settings, while creating a new print path in HP Web Jetadmin. Set features on your print driver before deploying (for example, enable or lock-out color printing).
- **HP Web Jetadmin Report Generation Plug-in 3.0**—Offers powerful insight into your print environment with a variety of reports that track everything from who uses color and how often they use it, to which devices are used most heavily and which have the highest uptime. Learn which application each job is printed from, get e-mail reports about overactive users, and proactively order supplies before running out.
- **HP Device Storage Manager Plug-in**—Manages the disk drive, flash, and RAM, as well as forms and fonts stored on the printer's system.

Technical specifications	HP Web Jetadmin 8.0 (Product number: J6052AA)
Supported network operating systems	Microsoft Windows 2000 Professional, Server, and Advanced Server, Microsoft Windows XP Professional (Service Pack 1), Windows Server 2003, SuSE Linux® 9.1 Professional, Fedora Core 2, support for SUN JRE 1.5.0_04-b05
Supported browsers	Microsoft Internet Explorer 6.0 (Windows only); Mozilla 1.6 (Linux only)
Shared print queue creation support	Microsoft Windows 2000 Professional, Server; Microsoft Windows XP Professional; Microsoft Windows 2003; SuSE Linux® 9.1 Professional, Fedora Core 2; HP-UX 11.0; Solaris 7 and 8; Novell NetWare 5.1 and 6.0 (IPX only) using NetWare Client 4.91—supported only on Microsoft platform
Network peripheral management supported printers	All HP and non-HP printers connected through HP Jetdirect print server and standard printer MIB-compliant third-party network connected printers
Supported network protocols	TCP/IP; IPX/SPX
