

HP Scitex XL1500 DS Upgrade*

Your HP Scitex XL1500 Printer prints almost any application on almost any media. Expand this versatility further with the HP Scitex XL1500 Dye Sub Upgrade. This upgrade allows you to enter the rapidly growing and lucrative textile printing market with minimal capital investment. Enjoy the same high-quality output with four-, six-, or eight-color printing and multiple print modes. Print textile signs that are easy to store, ship, display, care for, and re-use. Easily switch between solvent ink and dye sub ink.

* Compatible only with legacy Scitex Vision XL1500 Premium printers and original HP Scitex XL1500 printers

Expand your printer's versatility further with textile printing

- **Create textile signs that are light and easy to display, store, and ship.** Print textile applications such as flags, banners, and trade show signs. Because the applications are easy to fold and pack for compact storage, light and inexpensive to ship, and easy to hang, fabric applications are ideal for booth backgrounds and trade show signage.
- **Deliver high-quality, textile signs that stand up to heavy use and are easy to clean.** Create permanent images that will not crack, wrinkle, or fade. And if the signage gets dirty, you can wash or dry clean them without affecting the quality of the images. Re-use the same signage for greater value.
- **More vibrant applications, one versatile printer.** Your printer delivers vibrant, full-color images. Utilizing four-, six-, and eight-color printing and multiple custom print modes, you can deliver the same high-quality on textile applications. Unlike vinyl backdrops which can reflect light, textile backdrops have a smooth appearance.

Enter new markets with minimal investment

- **Enter a high-growth, lucrative market with minimal investment.** Add textile printing without purchasing a dedicated printer and dramatically increasing your business investment. The cost-effective HP Scitex XL1500 DS Upgrade can be added to your existing HP Scitex XL1500 Printer or you can purchase it as an option for new installation.
- **Expand your application base without giving up any production space.** Convert your printer into a textile printer with the HP Scitex XL1500 DS Upgrade—without losing the ability to print flexible, roll-fed media. Print a greater range of applications with the same wide-format production printer you already own.

Switch between textile and flexible media quickly

- **Switch between roll-fed media and textiles in minutes.** The HP Scitex XL1500 DS Upgrade integrates seamlessly with your HP Scitex XL1500 Printer. Switching between the solvent printing and textile printing could not be more simple. Press the Switching button on the control panel to activate the printer's software wizard. The printer will purge the current ink and switch to either the Dye Sub or solvent ink. A message will display when the printer is done, and you can begin printing.
- **Minimize training time and expenses with a single printing platform.** Your employees are already familiar with the printer, saving the time and expense of learning a new printing platform.
